DESCRIPTION

Scheduled for completion April 2026 by Chris Sandlin Homes, this modern midcentury inspired residence offers 5 bedrooms, 5.5 baths, and 5,200 square feet on a half acre corner lot with a 3 car garage. The facade blends warm brick and sleek metal accents with expansive black framed windows. Inside, the main level is planned for everyday ease with an open kitchen and living area, formal dining, a private study, and two bedrooms including a luxe primary retreat. Custom walnut cabinetry, quartz surfaces, designer lighting, and solid oak floors set a warm contemporary tone, with a generous island and a handy wet bar to make entertaining effortless. The primary suite features a spa bath and a custom closet that connects to the laundry. Upstairs brings a large game room with a beverage bar, three ensuite bedrooms, a second laundry, and a fully insulated walk in attic for convenient storage. Outdoor living shines with a deep covered patio, an outdoor kitchen, and a gas fireplace overlooking the expansive yard that can easily accommodate a pool or play space. Thoughtful construction and energy minded systems deliver comfort and peace of mind, including an engineered foundation, foam insulated envelope, premium windows and wide opening sliders, tankless hot water, efficient HVAC with smart thermostats, and a security prewire. With abundant natural light, a flexible study for work from home, and spaces designed to gather or retreat, this home balances design and function for the way you live. Premium windows and sliders blur the line between indoors and out, while the three car garage offers ample storage and EV ready power. The second downstairs suite is ideal for guests, multigenerational living, or a quiet nursery. Prewiring for audio, cameras, and motorized shades makes smart home integration simple. A central Dallas location places dining, parks, and top schools within easy reach. There is still time to personalize select finishes.
